

MEADOWSLEA ANGUS SPRING BULL SALE

MEADOWSLEA
ANGUS & SHEEP GENETICS

35 2-year bulls
63 yearling bulls

On-farm Helmsman Auction

Friday 8th October 2021

and

Online at

www.meadowslea.co.nz

from Sunday October 3rd

The Meadowslea hill-country type

Visual appraisal is still very important for selecting cattle to perform in hill - country

MASCULINE TRAITS - A strong head and jaw and thick neck indicate high levels of libido, testosterone and reproduction efficiency

NECK LENGTH - A thicker necked animal matures and reaches puberty earlier and has more libido

A longer neck indicates a higher maintenance animal that is slower to reach puberty and re-breed

HEART GIRTH - Large heart girth is an indicator of vigor and easy keeping ability

Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well on tussock

RIB FAT - Strong rib fat covers are the essential energy store for adverse conditions.

They indicate easy-doing and finishing ability and are directly related to increased fertility in both heifers and cows.

STRUCTURAL SOUNDNESS, FEET AND BONE - High country cattle cover large distances over rugged terrain so a strong skeleton is essential

HIDE - a good thick skin and coat is essential in the cold harsh environment

FLANK - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency

Higher flanked animals tend to be flighty, are higher maintenance and take longer to finish on grass

SCROTAL SIZE - Larger scrotal size at 12 months indicates daughters will reach puberty earlier, be more fertile, and re-breed early every year.

FRIDAY 8th OCTOBER

2021, 1pm,

Mt Cook Road, Fairlie

MEADOWSLEA SPRING BULL SALE

Friday 8th October 2021 1pm

**Online and On-Farm,
State Highway 8, 5km west of Fairlie
Online Bidding opens with
Video Release Sunday 3rd Oct, 7pm**

Sale Format

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously. This is to allow for the participation of those in attendance, as well as those online. The sale will be hosted on our own yourbid platform and accessed through our website www.meadowslea.co.nz. Prior to the sale, all lots will be filmed and available for viewing up until sale day on the Meadowslea website.

Bulls are available for viewing in the paddock anytime – just call 027 2299760 to arrange a time.

Registration for those in attendance will be at the on-farm office, where a copy of the conditions of sale will be posted.

Registration for those online will be through the Meadowslea website, where the conditions of sale will also be available.

Buyers will receive a buyer number as they register which will accompany each bid. Buyers registering online will receive a buyer number when they register for the sale which will automatically accompany each bid they place, whether they do so at home on their computer, or through their smart phone while in attendance. Those in attendance may also bid by writing on the supplied bidding cards and handing them in to the on-farm office staff. All live bids and all lots will be visible at all times, both online and on a big screen on-farm.

Online registration is available now and we encourage everyone to visit our website www.meadowslea.co.nz, to register, and then place practice bids on the demonstration lots on the auction page.

Online videos of each lot with accompanying commentary will be released both on our website and on facebook on Sunday Oct 3rd at 7pm. This video will include footage of every bull in the catalogue with comments and background information from the Meadowslea team and will be available for viewing right up until the conclusion of the sale.

Online bidding will be open from 7pm on Sunday Oct 3rd until the conclusion of the sale.

On Oct 8th, Sale Day, the on-farm registration and bidding will open at 11am. **Livestreaming with interactive viewing will commence at 12.30 pm** with a walk through of all the pens, with commentary from the vendors and genetic specialists. Requests to review particular bulls can be made through the web-site chat box or by telephone or text to the vendors or stock agents in attendance. This will continue throughout until the conclusion of the sale.

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours

Example:

\$2500 Displayed in **Red** denotes the Vendors reserve and indicates there has been no bid

\$3000 Displayed in **Blue** means an active bid has been received

\$3500 A new Bid has been Received within the last 2 minutes on this lot

\$3500 The holder of the leading bid will have the lot number highlighted in Green on their computer or their smart phone when logged in.

The sale will run until 2pm on Oct 8th. After this time the sale will conclude once there has been a period of at least 2 minutes without any bid being received on any lot. If another bid is placed on any lot during the 2-minute period, then time is extended and bids can be received on all lots for a further 2 minutes. This process will be repeated until a clear 2 minutes passes without any bids on any lot at which time the sale will conclude.

Final Time will be called clearly by the commentary team who will use their discretion to ensure all bidders are satisfied.

All updates will be posted on our website, as will an up-to-date version of this document.

Rebate Purchasing Commission. There will be no booking company in attendance and all buying companies will be responsible for booking of their own clients' purchases. Participating companies will be paid a purchasers' rebate commission as follows:

- 1 9% rebate commission paid to the nominated buying company, provided the vendor is advised of the purchase's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.
- 2 3% rebate commission paid to the nominated buying company when the vendor has **NOT** been advised of the purchaser's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.

FOREWORD

Meadowslea Angus Stud was established in 1985 with the purchase of capital stock females from Turihaua Station, Gisborne.

The herd today comprises 450 cows run on tussock country west of Fairlie at an altitude of 1500 to 2500 feet. The cows are run entirely under commercial conditions with all heifers calving as 2-year-olds or they are culled. Strong emphasis is placed on cow fertility and ease of calving with any dry cows culled.

Selection criteria is for easy-fleshing, moderate-framed cattle with plenty of meat and adequate fat cover, that will shift and perform in the South Island hill country. Sires used are all NZ-bred, with real emphasis placed on structural soundness, longevity, and fat cover. Over the last 12 years our stud cows have grazed next door on “Berkley Downs” native tussock blocks, and this has further tested their hardiness and constitution.

Sale bulls have spent 120 days on winter feed. The yearlings have been on fodderbeet where they have gained over 1 kg / day while the 2-year bulls cruised through the winter on kale. Both mobs were shifted onto grass in the second week of September.

In 2019 we had 190 stud heifers born and after losing 2 over the winter we mated all 188 on hand. For the second year in a row we had the same outstanding conception rate with only 3 empties. We believe it is the strong focus that we place on the maternal and fertility traits that is driving these outstanding results. Furthermore, the performance of our young R2-year heifers is leading the progress within the herd, and you will note that many of the bulls on offer are bred from these outstanding young cattle – either out of the 2-year heifers or bred by yearling bulls.

Strong maternal and fertility traits are the main driver of profitability in any beef herd, and they continue to be the major selection criteria in our breeding programme.

We always keep a selection of very good 2-year-old Angus bulls for this spring sale and this year is no exception, with some particularly meaty, easy-doing bulls on offer, many suited to heifer mating.

The yearlings include some top picks which will develop in to very good herd sires and there is a very good selection of low birth weight bulls suitable for heifer mating.

Meadowslea is a closed herd. All appropriate steps are being taken to ensure biosecurity is maintained at all times for ourselves and our clients.

All bulls tested clear and vaccinated for BVD. Scrotal contents and prepuce palpated with no abnormalities found.

We wish you well with your purchases and as always stand behind them 100%.

David Giddings

The Meadowslea Double - Diamond Brand of Quality

The Meadowslea Double Diamond brand is displayed on the 2yr bulls that are covered by our 3 year comprehensive guarantee and recommended for beef breeding herds.

These bulls have been structurally assessed by Bill Austin and the results are displayed on our Website.

Comments: We start the 2-year line-up with a pen of three K703 sons that show all the depth, thickness, and easy-doing attributes this blood line is known for. We selected Q479 to use as a yearling over stud heifers and it is easy to see why. This pedigree cross with Goldwyn 17 has proven to be very successful at Meadowslea and brings industry-leading fertility traits, with scrotal size, short days to calving, rib fat, and rump fat all in the top 2% for the breed. A lovely top-line, great head, depth, and thickness with a powerful hindquarter and a good structural assessment. He is a great cow or heifer mating option with a self-replacing index in the top 10% for the breed.

Comments: Q419 is almost identically bred to lot 1 and they were used alongside each other to mate yearling stud heifers. He is another very similar sound type with an excellent structural assessment. He displays exceptional depth of flank, which is always a great indicator of easy doing ability. This is certainly borne out with his rib and rump fats which rank in the top 2% of the breed. Q419 has strong fertility traits with moderate birthweight and good calving ease suitable for heifer mating. He has a very strong hindquarter and terrific outlook and balance with a very good top-line.

Comments: Another bull cast from the exact same mould, this time out of a cow by F540 so we have a double-up of strong maternal and fertility traits. Q419 has very good calving ease, short gestation, and low birthweight making him an ideal choice for heifer mating. He scanned with the second best EMA of the group and this shows in his depth of muscle and strong hindquarter. Another very good pick with a strong pedigree.

Comments: An outstanding bull here who has been a real favourite all the way! He is by a very good yearling later sold to Grampians Station and is out of a 2-year heifer. Used as a yearling over stud heifers, he displays terrific depth of flank which indicates easy-doing attributes and ensured he bounced back strongly and kept on doing all winter. Once again, those important rib and rump fats are in the top 5% for the breed, and with short days to calving and good scrotal size he has strong fertility traits. Plenty of growth, very sound, with a good structural assessment and a top outlook. Real potential here!

Comments: Here is another bull we really liked the look of as a yearling and selected to use over stud heifers. Bred to be the thick and square type that do so well for us, he is a classic Crump son with added thickness from Meat Machine on the dam side. A lovely, moderate-framed, quiet bull, he is a great pick for heifer mating with calving ease, very low birthweight, and short gestation. He displays a great coat, depth of body, and terrific easy-doing attributes. Another very good pick with strong fertility traits and good structural assessment.

Comments: Here is a very good clean-shouldered bull who is a great heifer mating prospect. Very strong fertility traits, deep, thick, with a very good hindquarter, balance, and outlook. Sired by a yearling and out of a 2-year Crump heifer. These young genetics are really leading the way as we continue to breed cattle more and more suited to hill country. Good efficient figures with moderate birthweight and cow size. Q332 has powerful fertility traits with good scrotal size and those signature short days to calving, rib fat, and rump fat in the top 5% for the breed - all combining for a good SR Index. A very easy-doing and well-balanced bull.

Comments: A very exciting pedigree here to lead off this pen. Sire N257 was sold in the 2019 Bull Sale for the top price of \$22,000 to Umbrella Range Angus, and the dam of N257 was the top price cow in our 2020 Female Sale, sold for \$5,500 to Australia. The dam of Q330 is a very smart 2-year Crump heifer who was later sold to Wether Hills Angus. The grandam of Q330 is the record-breaking 10-year-old cow G1000, sold to Australia for \$16,000. Q330 has very strong maternal and fertility traits with calving ease and low birthweight, while his scrotal size and short days to calving are in the top 10% for the breed. He shows all the depth and thickness you would expect from his pedigree and is a lovely easy-doing heifer mating type bull.

Comments: Another very good heifer mating option here, again by N257, but this time out of a 2-year heifer going back to Meat Machine, giving him that powerful hindquarter so dominant in that bloodline. Plenty of calving ease with a low birthweight and strong fertility traits of scrotal size and short days to calving. He displays plenty of easy-doing attributes with good strong fats and moderate cow size. This all gives a very strong SR Index that is in the top 10% for the breed in NZ. A sound bull with a good structural assessment.

Comments: Great calving ease and heifer mating option here again with this well-bred bull. His sire M429 was top price bull sold to Red Oak Stud in the 2018 sale and was a son of the \$100,000 Rangatira bull 13-38. His dam G843 is a top 10-year-old cow by Infinity who was sold in our 2021 female sale to Wether Hills Angus. Q225 is a nice, moderate-framed, well put-together, and deep bodied bull. He has super heifer mating figures with strong calving ease, short gestation, and low birthweight.

Comments: To lead out this next pen we have well-bred bull who is really on the move. A son of old F540 himself and out of a great old 9-year cow by Glanworth 0816. Grandam was also a top performing cow and produced 2 stud bulls. Q147 has great calving ease, low birthweight, and short gestation. He is very strong in the fertility traits with good scrotal size, while his short days to calving and fats are in the top 10% for the breed. This bull is a top heifer mating prospect and is really worth a close look. The real F540 type, super sound with a top structural assessment.

Comments: To lead off this pen we have selected an upstanding bull with an exciting pedigree. This is a son of the widely used Taimate Lazarus bull. His mother is a high-performing Crump daughter who is in the AI programme and has bred a stud bull L349 sold to Linnburn Station for \$11,000. Q222 was born a twin and has very impressive figures. He has moderate birth weight with calving ease and short gestation. Terrific fertility traits with scrotal size, short days to calving, rib fat, and rump fat all in the top 20% for the breed. Thick and deep with a very good backend and good structural score. Potential here and worth close inspection.

Comments: Here is a good N119 son out of a high-performing Goldwyn 17 cow who bred lot 3 in our 2020 bull sale, sold to Annandale at \$14,000. Q248 has terrific fertility traits with his scrotal size, short days to calving, rib fat, and rump fat all in the top 10% for the breed. Clean shoulders and a lovely square body with width across the loin make him very suitable for the hill country environment. Very strong IMF coming from Goldwyn 017 in his background. A good, very sound, well-balanced, mid-frame bull.

71%	42%	57%	57%	58%	59%	54%	52%

Comments: Here is a son of M564, and a grandson of the record- breaking cow G1000. This bloodline always has terrific EMA - this bull is no exception scanning with the biggest EMA in this group. He is out of a very good Crump cow who was a feature lot in our 2020 sale selling to Wether Hill Angus. Very strong fertility traits with scrotal size and rib and rump fats in the top 10% for the breed while his short days to calving rank him in the top 1%. He has easy-doing ability with a low birthweight all combining for a top SRI. index.

Comments: We start the yearlings with the classic F540 x Crump cross which works so well for us at Meadowslea, and always gives such terrific maternal and fertility traits. R734 has inherited the important traits for heifer mating and has low birthweight with calving ease and very short gestation at -6 days. He has a milk figure in the top 10% for the breed whilst his short days to calving EBV ranks him in the top 1% in NZ. He scanned well, with the second-best IMF% in the group, and his rib and rump fats are in the top 10% in NZ. A lovely, upstanding, well-balanced bull with a terrific top-line, plenty of length, and some scale about him.

Comments: A very deep-bodied and beautifully sound L226 son with a very strong hindquarter. Out of a top-breeding Infinity cow who has bred 2 previous stud bulls both used as yearlings within the stud. G843 herself was sold in our 2021 Female Sale to Wether Hill Angus Stud. R640 has good calving ease, a super low birthweight, and measured with the top scrotal size in the group. He scanned very well with the third best EMA in the group and you can see the exceptional muscle along his loin. Great head, bone and balance - a top pick!

57%	40%	54%	52%	56%	54%	53%	51%

Comments: A son of M429, who was sold to Red Oak Stud for \$18,000, and out of a cow by Crump that goes back to our great old matriarch cow A300 - the grandam of F540. As one would expect he has good fertility and maternal figures. R636 has a terrific set of numbers for heifer mating, with calving ease, low birthweight, good muscle, and very short days to calving all combining for a very strong SR Index. Plenty of scope and scale about this chap. Potential here!

Comments: Another powerfully-built bull here, with plenty of stretch and scope again. A good pedigree with grandam H104 having bred two of our top stud sires - L226 and M452 - who both have very good sons in this sale. Moderate birthweight, plenty of growth, and very strong fats give a very good index. Another bull worthy of a good close look for cows of heifers. Get in behind this chap - he has real width!

54%	40%	53%	51%	55%	53%	51%	50%	

Comments: The first of the M564 sons in this catalogue. M564 is the son of G1000, the record priced cow who passes on her exceptional EMA to all her progeny. As we would expect, R748 scanned very well for EMA with the 4th largest measured in this group, as well as very good IMF percentage. He has also inherited exceptional fertility figures from this bloodline, with short days to calving and rib fat in the top 2% for the breed, ensuring he gets a very good self-replacing index. With a bit more scale he will grow into a big strong bull.

The award-winning **yourbid** online selling platform was developed by the Giddings Family for their 2020 Angus Female Sale which was held during the first Covid Lockdown.

The system was further developed to incorporate on-farm and online bidding, and has been used successfully for 9 further sales at Meadowslea.

It has also been used to run a number of sheep and cattle sales for other studs both in NZ and the UK.

For all enquiries to used **yourbid** please contact **george@yourbid.org**

The development of the “Meadowslea Hill Country Type”

has been the result of 25 years of selecting animals that perform the best in our hash hill country environment. Cows that can winter easily on the hill without supplements, stay in good order, calve easily and get back in calf early every year for 10 years has been the focus of our breeding programme.

Ultra-sound scanning has confirmed to us that these easy doing cattle have higher levels of Rib and Rump fat. Science has now recognised that these higher fat levels result in heifers getting in calf earlier with higher conception rates. These higher fat levels also result in increased fertility in the whole herd with earlier rebreeding and less dry cows.

These great positive fat EBV's in the Meadowslea herd have come about simply by selecting animals that suit the Hill Country environment.

Carcase Rib Fat (mm)

- Meadowslea herd
- Australasian herd average

Graph showing improvement in fat EBVs at Meadowslea while running the herd on hill country, compared with Australasian average. From TransTasman Angus Cattle Evaluation.

The average rib fat EBV of the bulls in this catalogue is +2.1 ranking in the top 10% for the breed in Australasia.

Meadowslea Proven Herd Sires

Meadowslea F540

Trait leader for Short Gestation, Milk, and Short Days to Calving. He ranks in the top 15% of the breed for all the fertility and maternal traits measurable. He was ranked 3rd for Short Gestation in the BLNZ Dairy Beef Progeny Test in 2018. His progeny also performed very strongly in the BLNZ Beef Progeny Test cohort 2 – for both growth and carcass traits.

Turihaua Crump E5

Trait Leader for Short Days to calving. 12 years old and still going strong. Over 350 calves to date at Meadowslea. His young daughters are the top breeding cows in the herd and proving to be exceptionally fertile and early maturing - resulting in his Days to Calving figure going down to minus 10 days.

- Breed Trait Leaders for Maternal and Fertility Traits

Meadowslea Meat Machine G914

The Bull we call the “Meat Machine” – Exceptional thickness and fertility traits. He is a Trait leader for Calving Ease, his Low Birth Weight figures are in the top 5% for the breed and his Rib and Rump Fats are off the scale. His sons are full of meat, exceptionally easy doing and very suitable for heifer mating in the harder hill country. We can’t get enough of this bloodline and he now ranks in the top 15% for Self Replacing Index as well.

Meadowslea K703

A son of Meat Machine who has wonderful maternal and fertility traits and ranks in the top 10% of the breed for almost all those key traits responsible for profitability in the hill country in a self-replacing herd. His short days to calving and Rib and Rump fats are off the scale and all this combines to place him in the top 15% of the breed for the Self Replacing Index . His progeny are deep, thick, early maturing and full of muscle.

A Brand New Initiative using our original Brand Mark

Over 10,000 Meadowslea sired calves are born each year. Most are in the hill country under sustainable grass fed systems.

Clients are successfully using Meadowslea brand-marked ear tags as a step towards progeny identification. The personalized tags allow clients to identify genetics and follow performance from herd to marketplace

A Great Opportunity for our clients

Meadowslea offers to supply brand-marked ear tags, printed with the Client's property name, free of charge to clients, to tag all their calves.

The tags can be linked to NAIT EID tags for further traceability.

DNA records are available for all Meadowslea sires, which will allow sire verification of progeny and traceability.

The brand-marked tags will enable Feedback of performance both in the client's herd, and the Marketplace. Easy Sale yard recognition will also lead into profitable supply to top end markets currently under development.

To take up this opportunity, meet with the Allflex rep at our Spring Bull Sale on Friday Oct 9th at 1pm and place your order there.

Be part of our Paddock to Pan Story which leverages off our sustainable genetics, which are bred in the hill country without the use of supplements or nutrient leeching fertilizer.

Our beef has a taste of its own.

This is also Your story waiting to be told.

Comments: To lead off this next pen we have the first of the N166 sons in this catalogue. R829 is a standout bull. His dam is a top performer with three previous top sale bulls and a retained stud keeper. Moderate birthweight, and exceptional short days to calving in the top 1% for the breed indicates good fertility. He has very strong fats and a moderate frame generating a good SR index. The N166 sons are an outstanding line this year, and this fellow shows all the depth, thickness, and strength they display. He has the great coat and very good hindquarter from the Crump bloodline. Top pick!

Comments: The sire of this chap, Stern 711, was purchased as a yearling in 2019 as an outcross bloodline to breed heifer-mating bulls. His first son to be offered certainly has a terrific set of data with good calving ease, very short gestation, and moderate birth weight followed by very good growth. He scanned with an excellent EMA which together with his fertility traits have given a SR Index in the top 10% for the breed. He has a good top to him with a strong hindquarter. Worth close inspection.

Comments: A very well-balanced bull here by N119, out of a cow by F540 who has previously bred a stud bull sold to Okaka Angus at \$15,000. Maternal Grandam is F801 who bred a \$22,000 son to Umbrella Range Angus, and she was herself sold to Australia for \$5,500. R688 has strong maternal and fertility traits as you'd expect, with calving ease, very short gestation, and moderate birthweight. His short days to calving, rib fat, and rump fat are in the top 2% for the breed and he also scanned with very high IMF%. A nicely balanced bull with a good outlook and a strong SR index.

Comments: A deep-bodied bull here by P700, who was retained in 2020 as a specialist heifer mating sire. R599 has lovely heifer mating figures with strong calving ease, short gestation, and low birthweight. A good pedigree - out of a 2-year heifer with the grandam having produced lot 1 in our 2021 bull sale. He scanned exceptionally well with the very top IMF% and fats of the entire group, giving him a very strong SR index.

Comments: An upstanding son of Turiroa 14830 with lovely clean shoulders and good outlook. Strong fertility traits and very good rib and rump fats in the top 10% for the breed. Plenty of growth and the good backend we always get from the Turiroa bloodline. This is an impressive young sire with presence and style.

48%	32%	49%	44%	47%	46%	44%	42%	

Comments: A son of Stern 711, out of a K703 cow, so with these sires in the pedigree we expect exceptional figures for heifer mating and good muscle. R872 has outstanding calving ease and low birthweight in the top 10% for NZ. He scanned really well for EMA and has strong fats as well, all combining for a very strong SR index. A deep-bodied, compact bull.

Comments: Superb heifer mating figures on this P703 son. A good pedigree here, out of a high performing cow by F540 who bred a son sold to Flagstaff Station for \$14,000 in 2020. Good calving ease with short gestation and low birthweight. Very good easy-doing fats on a moderate frame. We like the look of this chap.

Comments: A son of the very good Lazarus bull who was used in the stud and later sold to Helmsdale Angus for \$18,000. Out of a 2-year heifer by Crump, this is a good pedigree with the Grandam breeding a stud bull as well. This chap is worth a good look at, has potential with moderate birthweight, good fertility traits, and strong IMF scanning with the 4th highest marbling % of the sale bulls.

Comments: Very strong heifer mating figures here to finish on. This is a son of the yearling P700, and out of a 2-year heifer by M429, who was sold to Red Oak Stud for \$18,000. These young genetics are certainly leading the way. Low birthweight, very strong calving ease, and short gestation. He has great fertility traits and very strong rib and rump fats which combine to give a strong SR Index of \$123.

Premier Bull cover

What is Premier Bull cover?

All bulls auctioned at this sale up to the value of \$50,000 will automatically be covered under FMG's Premier Bull cover for 14 days at no cost to the purchaser.

Length of cover

To extend cover for the specified bull beyond 14 days you need to tick Premier Bull cover 12 months on the Purchaser Instruction and Insurance Slip in this catalogue. The specified bull is then covered for the remaining period of 12 months. The premium is payable to FMG and is in addition to the purchase price of the bull.

If you require an alternative cover period talk to an FMG representative.

Your bull's value

Any bull covered under this policy must be purchased for \$50,000 or less. For any bull purchased over \$50,000 talk to an FMG representative.

During the period of insurance, the specified animal is covered for:

- Death or infertility as a result of accident, disease or illness.
- Transit.
- Theft.

What we will pay

Fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

PROVEN TO PERFORM IN A TOUGH TESTING GROUND

Meadowslea stud cows live in a different world to most Angus Stud cows in NZ and have naturally developed into a type that thrives in their environment. Moderate framed cows that have deep wide bodies and carry good fat covers are proven to be the most productive in this country. The Use of Strong NZ bloodlines ensures this suitability for the environment will continue.

At Meadowslea our strong focus on the key Maternal and Fertility traits is driven by 30 years of successfully mating yearling heifers, the results are clear to see. Many of our clients, in some of NZ's tough environments, are successfully calving heifers as 2yr olds and achieving outstanding conception and re-breeding results.

It is no surprise then that Meadowslea bulls shift and perform for clients in hill country.

PROVEN WHERE IT COUNTS!

NZ Trait leaders for CALVING EASE and SHORT GESTATION

These two senior sires, now aged 11 and 10 years, have had a profound impact on the Meadowslea stud and the bulls in this catalogue, with a large selection ideally suited to heifer and dairy cow mating. This is a real endorsement of the emphasis we place on fertility and maternal traits in our breeding programme.

MEADOWSLEA F540 - 11 years old and still going strong. Outstanding maternal and fertility traits; ranks in the top 15% of the breed for calving ease, and the top 10% for scrotal size, rib fat and rump fat. His short gestation, milk, and short days to calving figures are in the top 1%! **SEMEN AVAILABLE**

MEADOWSLEA MEAT MACHINE G914 - deep, thick, and exceptionally well muscled. He is a trait leader for calving ease, and ranks in the top 5% of the breed for short gestation, the top 10% for low birth weight, and the top 1% for both rib and rump fat. **SEMEN AVAILABLE**
