Comments: Note: this final pen of heifers missed the latest data run - and so their latest scanning and growth data will not be updated until May 1st. We start this pen of quality heifers with this daughter of L226. She goes back to a cow by the great Glanworth 0816. Terrific solid type of heifer, with real width to her. Great depth, volume, and capacity with a deep flank and strong hindquarter. Strong coat, she also scanned with the top rib and rump fats and a very top IMF of 7.1%. Good calving ease, moderate birthweight and mature cow weight make her an ideal hill-country type. We rated her highly and put her to Q178.

Comments: A daughter of the Loyalty son P654, and out of a 2-year heifer by Meat Machine. Calving ease with moderate birth weight and the efficient mature cow weight we aim for. All this data combines to generate a good SRI index. Great topline, terrific depth through the flank and a great hindquarter. She exhibits all the muscling we expect from the Meat Machine bloodline. A very solid type mated to Rockley 41.

Comments: Here is a direct daughter of Loyalty, out of a cow by KayJay Crampton and going back to the great Glanworth 16. Fantastic depth and thickness once again. Lovely width across the top, strong hindquarter and a great coat on her. Calving ease with low birthweight and very moderate efficient cow size. She scanned with good fats and plenty of IMF, which combine to give her a very good SRI index. A top heifer and again we selected her to mate with Q178.

Comments: A nice upstanding Meat Machine daughter out of a good 10-year-old cow. Moderate framed with clean shoulders giving good calving ease. She has good muscle and a nice topline with balance, and style. Another exciting AI mate to the Turihau N59 who is breeding so strongly for Ratanui Angus.
