

MEADOWSLEA ANGUS SPRING BULL SALE

MEADOWSLEA
ANGUS & SHEEP GENETICS

29 2-year bulls
66 yearling bulls

On-Farm Helmsman Auction
Friday 7th October 2022, 1pm
and

Online at

www.meadowslea.co.nz

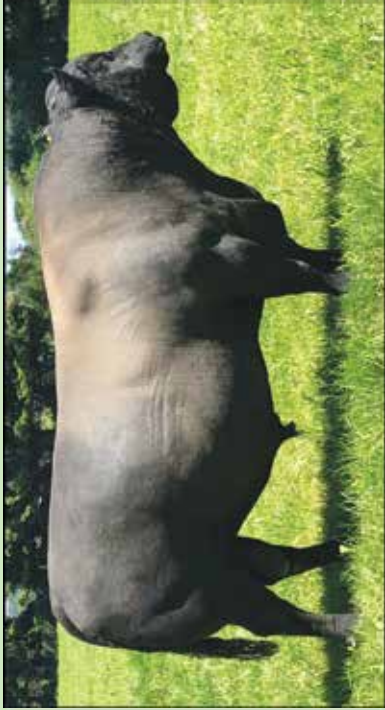

from Sunday October 2nd

NZ Trait leaders for CALVING EASE and SHORT GESTATION

These two senior sires, now aged 11 and 12 years, have had a profound impact on the Meadowslea stud and the bulls in this catalogue, with a large selection ideally suited to heifer and dairy cow mating.

This is a real endorsement of the emphasis we place on fertility and maternal traits in our breeding programme.

MEADOWSLEA F540 – Now 12 years old. Outstanding maternal and fertility traits. Ranks in the top 5% of the breed for short gestation, milk, short days to calving and rib and rump fats. He also ranks in the top 20% for calving ease, low birth weight and scrotal size. **SEMEN AVAILABLE**

MEADOWSLEA MEAT MACHINE G914 - deep, thick, and exceptionally well muscled. He is a trait leader for calving ease, and ranks in the top 5% of the breed for short gestation, the top 10% for low birth weight, and the top 1% for both rib and rump fat. **SEMEN AVAILABLE**

FRIDAY 7th OCTOBER 2022, 1pm, Mt Cook Road, Fairlie

ANGUS & SHEEP GENETICS

MEADOWSLEA SPRING BULL SALE

Friday 7th October 2022 1pm

**Online and On-Farm,
State Highway 8, 5km west of Fairlie
Online Bidding opens with
Video Release Sunday 2nd Oct, 7pm**

Sale Format

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously. This is to allow for the participation of those in attendance, as well as those online. The sale will be hosted on our own yourbid platform and accessed through our website www.meadowslea.co.nz. Prior to the sale, all lots will be filmed and available for viewing up until sale day on the Meadowslea website.

Bulls are available for viewing in the paddock anytime – just call 027 2299760 to arrange a time.

Registration for those in attendance will be at the on-farm office, where a copy of the conditions of sale will be posted.

Registration for those online will be through the Meadowslea website, where the conditions of sale will also be available.

Buyers will receive a buyer number as they register which will accompany each bid. Buyers registering online will receive a buyer number when they register for the sale which will automatically accompany each bid they place, whether they do so at home on their computer, or through their smart phone while in attendance. Those in attendance may also bid by writing on the supplied bidding cards and handing them in to the on-farm office staff. All live bids and all lots will be visible at all times, both online and on a big screen on-farm.

Online registration is available now and we encourage everyone to visit our website www.meadowslea.co.nz, to register, and then place practice bids on the demonstration lots on the auction page.

Online videos of each lot with accompanying commentary will be released both on our website and on facebook on Sunday Oct 2nd at 7pm. This video will include footage of every bull in the catalogue with comments and background information from the Meadowslea team and will be available for viewing right up until the conclusion of the sale.

Online bidding will be open from 7pm on Sunday Oct 2nd until the conclusion of the sale.

On Oct 7th, Sale Day, the on-farm registration and bidding will open at 11am. **Livestreaming with interactive viewing will commence at 12.30 pm** with a walk through of all the pens, with commentary from the vendors and genetic specialists. Requests to review particular bulls can be made through the web-site chat box or by telephone or text to the vendors or stock agents in attendance. This will continue throughout until the conclusion of the sale.

A live screen on the website will show all lots alongside their current prices and the buyer number of the bidder who holds that lot. On-farm attendees will be able to view on a big screen on site. Bids will be displayed on a computer or smart phone screen in the following colours

Example:

\$2500 Displayed in **Red** denotes the Vendors reserve and indicates there has been no bid

\$3000 Displayed in **Blue** means an active bid has been received

\$3500 A new Bid has been Received within the last 2 minutes on this lot

\$3500 The holder of the leading bid will have the lot number highlighted in Green on their computer or their smart phone when logged in.

The sale will run until 2pm on Oct 7th. After this time the sale will conclude once there has been a period of at least 2 minutes without any bid being received on any lot. If another bid is placed on any lot during the 2-minute period, then time is extended and bids can be received on all lots for a further 2 minutes. This process will be repeated until a clear 2 minutes passes without any bids on any lot at which time the sale will conclude.

Final Time will be called clearly by the commentary team who will use their discretion to ensure all bidders are satisfied.

All updates will be posted on our website, as will an up-to-date version of this document.

Rebate Purchasing Commission. There will be no booking company in attendance and all buying companies will be responsible for booking of their own clients' purchases. Participating companies will be paid a purchasers' rebate commission as follows:

- 1 9% rebate commission paid to the nominated buying company, provided the vendor is advised of the purchase's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.
- 2 3% rebate commission paid to the nominated buying company when the vendor has **NOT** been advised of the purchaser's intention to buy prior to the commencement of the on-farm sale, or before the purchaser commences bidding online.

FOREWORD

Meadowslea Angus Stud was established in 1985 with the purchase of capital stock females from Turihaua Station, Gisborne.

The herd today comprises 500 cows run on tussock country west of Fairlie at an altitude of 1500 to 2500 feet. The cows are run entirely under commercial conditions with all heifers calving as 2-year-olds or they are culled. Strong emphasis is placed on cow fertility and ease of calving with any dry cows culled.

Selection criteria is for easy-fleshing, moderate-framed cattle with plenty of meat and adequate fat cover, that will shift and perform in the South Island hill country. Sires used are all NZ-bred, with real emphasis placed on structural soundness, longevity, and fat cover. Over the last 13 years our stud cows have grazed next door on “Berkley Downs” native tussock blocks, and this has further tested their hardiness and constitution.

Sale bulls have spent 120 days on winter feed. The yearlings have been on fodderbeet where they have gained over 1 kg / day while the 2-year bulls cruised through the winter on kale. Both mobs were shifted onto grass in the second week of September.

In 2019 we had 190 stud heifers born and after losing 2 over the winter we mated all 188 on hand. For the second year in a row we had the same outstanding conception rate with only 3 empties. We believe it is the strong focus that we place on the maternal and fertility traits that is driving these outstanding results. Furthermore, the performance of our young R2-year heifers is leading the progress within the herd, and you will note that many of the bulls on offer are bred from these outstanding young cattle – either out of the 2-year heifers or bred by yearling bulls.

Strong maternal and fertility traits are the main driver of profitability in any beef herd, and they continue to be the major selection criteria in our breeding programme.

We always keep a selection of very good 2-year-old Angus bulls for this spring sale and this year is no exception, with some particularly meaty, easy-doing bulls on offer, many suited to heifer mating.

The yearlings include some top picks which will develop in to very good herd sires and there is a very good selection of low birth weight bulls suitable for heifer mating.

Meadowslea is a closed herd. All appropriate steps are being taken to ensure biosecurity is maintained at all times for ourselves and our clients.

All bulls tested clear and vaccinated for BVD. Scrotal contents and prepuce palpated with no abnormalities found.

We wish you well with your purchases and as always stand behind them 100%.

David Giddings

Structural Assessment

The two-year bulls have undergone independent structural assessment by Bill Austin using the Australasian Beef Class system. Results are tabulated in the back of this catalogue.

Comments: We kick off our 2022 Spring Sale with a very exciting prospect who showcases the young genetics leading the way here at Meadowslea. R558 is an extremely well-balanced bull, by a very good yearling sire P617 from the Meat Machine bloodline, who was later sold to Kennethmont Station for \$9,000. He is out of a 2-year-old heifer and has impressive maternal and fertility traits. Good calving ease, short gestation, and low birthweight combined with a lovely clean shoulder make him a top pick for heifer mating. He has the exceptional fertility indicators of good scrota size, combined with short days to calving and rib fat figures in the top 10% of the breed. All this data will ensure his daughters hit puberty early, re-breed early each year, and become efficient moderate-framed cows ideal for hill-country. A very sound bull with a top structural assessment score.

Comments: Another very stylish heifer mating option to follow with this son of L256. R823 has a strong pedigree featuring both Crump and F540, meaning his short days to calving fertility traits will be at the leading edge of the breed. His dam is breeding well for us with her first son M1004, produced as a 2-year heifer, sold to Piko Burn Angus at \$10,000 where he bred their top selling bulls in 2021. R823 has great heifer mating figures with calving ease, low birthweight, and a nice clean shoulder. He has the efficient moderate cow size with very strong rib and rump fats in the top 5% of the breed and displays the easy-doing attributes required in hill country.

Comments: Here is a thick, powerful bull by L226 out of a good 10-year-old. R683 has calving ease with moderate birthweight making him suitable for both heifers and cows. He has plenty of volume and capacity with very good growth. He is strong in the fertility traits with short days to calving and his scrotal size is in the top 10% of the breed. A good strong pick for hill-country, who will produce fertile daughters, as well as progeny that will grow to heavy weights and attract good marbling premiums.

Comments: Here is a powerful, well-bred bull sired by N141, who sold in our 2019 sale for the top price of \$22,000 to Waimara Angus, where he bred many of the top bulls in their 2022 sale. Out of a strong performing Goldwyn 17 cow who has bred 3 stud bulls. R593 is also a heifer or cow mating option, with calving ease, low birthweight, and very short gestation in the top 5% of the breed. He is strong in fertility with very short days to calving, and this data combined with his moderate cow weight generates a very good SRI index in the top 5% of the breed, indicating efficiency for hill country production. He scanned with good muscle and this is easy to see this in his powerful hindquarter.

Comments: Here is an impressive bull sired by N166, who was the feature sire in our 2022 winter sale with sons selling to \$92,500. R794 is out of a great 10-year-old cow who was sold in our 2022 Female Sale and who produced 4 previous sale bulls. As always with the Crump bloodline we get good fertility traits with short days to calving, good scrotal size, and the important rib and rump fats in the top 10% of the breed ensuring his daughters will be easy keeping and fertile in the hardest country. Moderate birthweight and clean shoulders give a heifer mating option once again. A lovely well-balanced, stylish N166 son with a good structural assessment, who is worthy of close inspection.

Comments: Another impressive N166 son to follow. We used this chap as a yearling to mate stud cows, following up his father in the second cycle. Like his sire he has a tremendously powerful head with exceptional growth ranking in the top 10% of the breed. He is strong in fertility with good scrotal size and short days to calving. A powerful sire who will develop into a very impressive adult bull.

Comments: Here is a powerful bull with a very strong pedigree. His dam is G1000 our record breaking 10-year-old cow who sold in our 2021 Female Sale to Ballanee Angus in Australia for \$16,050 and is currently being flushed for embryos for export. R812 is a powerful bull who has inherited his mother's growth with his 200-, 400-, and 600-day figures all in the top 10% of the breed in NZ. He is also strong in fertility with short days to calving and good scrotal EBVs. He scanned with good EMA which has been strongly inherited in all of G1000's progeny. A deep, thick-bodied bull with a powerful hindquarter.

Comments: This chap is sired by P514 who was used as a yearling and then sold at lot 1 in the 2020 Spring Sale, and his pedigree goes back to Meat Machine. He is out of a good young cow by Goldwyn 17 and we have bred some very good cattle with this cross of bloodlines. Another terrific heifer mating option here with calving ease, short gestation, and low birthweight. Top fertility as well with short days to calving and rib fats both ranking in the top 2% of the breed. Scanning was equally as impressive with the 4th best EMA and IMF% out of all 190 bulls measured. Well put together with a solid structural assessment score making him a very good pick.

Purchaser:

Comments: A well put-together bull here with a strong pedigree, by Goldwyn 17 and out of a young Crump cow, with his maternal grandam a great 10-year-old cow. R901 is well suited to heifer mating with low birthweight and nice clean shoulders. As we would expect with this combination of bloodlines, he has the important fertility trait of short days to calving ranking him in the top 5% of the breed. This is a very sound young sire with a good structural assessment score who we think will develop into a very good bull. Worth a very close look.

Comments: Another Goldwyn 17 son to follow bred the same way. R943 is out of a top performing Crump cow whose first calf, produced when she was a 2-year heifer, sold to Reece Whitelock for \$10,000. This Goldwyn x Crump combination always works well and R943 is again a very sound bull with a good structural assessment score. He has inherited strong fertility traits from both parents with a short days to calving in the top 1% of the breed, meaning his daughters will calve early every year. Suitable for heifers with a nice clean shoulder.

Comments: Here is a growthy bull by the very good Lazarus yearling P556, who went on to be sold to Helmsdale Angus at \$18,000. Out of another of these top breeding Crump cows, ensuring he gets plenty of fertility with his important short days to calving figure in the top 5% of the breed. These P556 sons all scanned well and R625 has IMF% in the top 20% of the breed and his easy doing rib and rump fats rank him in the top 5% of the breed. A nice, easy-fleshing bull with a strong hindquarter.

Comments: Super figures here on this Lazarus son. He has an exceptional pedigree being out of one of the top performing F540 cows in the herd, who was the top price in our 2022 Female Sale selling at \$5500 to Albert Hill Angus. She has bred very strongly including a stud bull sold to Turihaia at \$24,000. R585 has exceptional maternal and fertility traits ranking him in the top 10% of the breed for almost every trait measurable. He scanned very well for muscle and fats which combined with his moderate, efficient cow size generates an exceptional Self Replacing index in the top 5% of the breed.

Comments: A son of N119 here with a good balance of figures for heifer mating. He has calving ease with moderate birthweight and short gestation. He shows exceptional fertility traits with scrotal size, short days to calving, and rib fat all in the top 10% of the breed. Good muscle and IMF in an efficient, moderate frame size make him a good pick.

Comments: Here we have the first of 2 sons of M564 and grandsons of the record-breaking cow G1000. R833 has an exceptional pedigree with his dam a top Crump cow breeding good sale bulls including P868 sold to Greg Hand at \$14,000. His maternal grandam was also a top breeder and was the dam of H134, the top price 10-year-old cow in our 2022 Female Sale. R833 has impressive fertility figures with his short days to calving in the top 2% for breed. Very good muscle from the G1000 cow and exceptional rib and rump fats. Worth a close look!

72%	46%	59%	59%	60%	61%	56%	54%	

Comments: Another impressive M564 son, this time with ideal figures for heifer mating. Calving ease with low birthweight followed by good growth. Strong fertility and that good EMA coming down from the great G1000 cow in the background. Easy doing traits with rib and rump fats in the top 5% of the breed. This is a good sound bull with a very good structural assessment.

Purchaser:

Price: \$

69%	37%	56%	55%	56%	57%	51%	48%

Comments: This bull was mismothered as a young calf and weaned at only 135kg but is really starting to catch up now. His dam is a very good Crump cow who weaned a cracking calf again last year at 295kg. R825 has a good pedigree being sired by Rangatira 16-209 who bred our top priced bull in 2021. He has good calving ease, short gestation and low birthweight. His growth figures reflect his light weaning weight, but his progeny will grow much better than his EBV prediction. This is a very sound bull with a top structural assessment score, and we recommend having a close look here.

Comments: We lead off the yearling sale with this exceptional son of P700. A top pedigree here with the dam J422 a Reality cow who bred lot 42 in our 2022 June bull sale, sold at \$10,000, and scanned with the biggest EMA in the sale. S268 has terrific figures for heifer mating with great calving ease, short gestation, and low birthweight. He has wonderful easy fleshing with rib and rump fats in the top 10% of the breed, and good fertility traits in a moderate efficient frame. A well-balanced bull who is deep, thick meaty and square with a top hindquarter and ideal figures for heifer mating.

Comments: The first of a good line of sons By Timperlea Quain, a Lazarus son we purchased as a yearling for \$9,000 and used as a specialist heifer mating sire. S260 has a strong pedigree being out of a 2-year heifer by M564 who is a son of the record-breaking cow G1000, and the maternal grandam is a good Crump cow. He has very good calving ease, low birthweight, and short gestation in an early maturing moderate frame. He displays wonderful easy fleshing with fats in the top 5% and a SR Index in the top 10% of the breed. A top pick!

Comments: A tidy son here of the yearling Q529, who was a good F540 son sold in our 2021 Bull Sale to Andrew Overton. Out of a 2-year heifer going back to both Crump and Goldwyn 17 so a stacked pedigree here. A nice balance of figures for heifer or cow mating with moderate birthweight followed by very good growth. Exceptional fertility with scrotal size and short days to calving in the top 10% of the breed, as are his fats. A clean shouldered, well balanced, upstanding bull with a good top-line and depth through the flank.

Comments: Here is another son of Q290 to follow. Q290 was sold in the 2020 sale to David Hyde at \$10,000, he is a grandson of the record price cow G1000 and inherited her massive EMA. S126 is out of another of these good 2-year heifers that are leading the way at Meadowslea and has moderate birthweight with clean shoulders for heifer mating. He has fantastic fertility traits with both scrotal size and short days to calving in the top 5% for breed, he scanned with good muscle, and his fats that are off the scale!! Great top-line with length, scope, and scale about him.

Comments: Here is an exciting prospect by P581 who was sold to Picton Park Angus for \$12,500 in our 2020 sale and used in the AI programme. Very strong maternal line with the grandam H107 also the dam of Meadowslea Mountain Man R705, sold in 2022 to KJ Angus for \$92,500. The paternal grandsire is the \$100,000 Rangatira 13-38. S223 has a great balance of figures with calving ease and moderate birthweight followed by very strong growth. Exceptionally well-balanced bull with lovely clean shoulders, terrific width across the top, and a deep barrel. Scanned well for muscle, fat and IMF. Must be a real prospect with that pedigree behind him. Have a close look here!

Comments: Another well-bred bull here, this Loyalty son is out of a good cow by F540 who has bred previous sale bulls selling to \$13,500. Exceptional depth and thickness as well as a great heifer or cow mating option with calving ease, low birthweight, and powerful growth. Great length and depth to him with a strong coat. Will grow into an impressive sire.

Comments: The first of the Turihaua Rhinestone progeny offered for sale. They are an outstanding line of bulls with a good number retained to be a real feature for the 2023 winter bull sale. Once again out of a good F540 cow so we know to expect good maternal and fertility traits. S239 has calving ease with clean shoulders and low birthweight followed by strong growth making him a top prospect for heifer or cow mating. An impressive, upstanding, well-balanced bull with depth, thickness and scale about him. Will be an impressive 2-year-old!

Comments: A well-bred bull here again with the sire a top yearling who went on to be sold at lot 2 in our 2021 sale for \$24,000 to Glanworth Angus. Out of Crump cow so we know to expect good fertility traits and S370 has good scrotal size, short days to calving in the top 2%, and fats in the top 10% of the breed. With his clean shoulders, calving ease, low birthweight, and strong growth he is suitable for both cows and heifers. He displays a bit more scope and stretch about him with good width across the pin bones, strong hindquarter and a good coat.

Comments: Here is one of only 2 bulls catalogued by old F540 himself, he is out of a Crump cow which has proven to be a wonderfully successful cross at Meadowslea. S210 has inherited all the maternal traits from these two great bloodlines with calving ease, low birthweight and short gestation. He is strong in the milk EBV and his short days to calving is industry leading at -8.2 days. He has those terrific easy doing fats we aim for in the hill country with a great top line and depth of body. Clean shoulders make him a great heifer option. Plenty of scope and scale with nice balance about him - a good pick.

Comments: A nice moderate framed P700 son with a very impressive pedigree. His maternal grandam is the great cow H107, who is the dam of Meadowslea Mountain Man R705 sold to KJ Angus for \$92,500. His paternal pedigree features Crump and Meat Machine so we expect plenty of maternal and fertility traits in this cross. S365 certainly doesn't disappoint with terrific calving ease, low birthweight, and short gestation. His fertility is outstanding with good scrotal size and short days to calving while his rib and rump fats rank in the top 5% of the breed. Deep and thick with a strong hindquarter he is certainly one to watch!

Comments: Another deep, compact P700 son, this time out of a 2-year-old heifer by Lazarus so you would expect good figures. Back to a good 10-year-old cow sold in the 2022 Female Sale at lot 109 to Albert Hill Angus. Good top-line, wide across the top, and with a deep body. Good calving ease, low birthweight, scrotal size and days to calving indicating good fertility, with fats in the top 10%. Scanned very well for EMA, fats and actual IMF as well.

Purchaser:	Price: \$
-------------------	------------------

The award-winning [yourbid](#) online selling platform was developed by the Giddings Family for their 2020 Angus Female Sale which was held during the first Covid Lockdown.

The system was further developed to incorporate on-farm and online bidding, and has been used successfully for 16 further sales at Meadowslea.

It has also been use to run a number of sheep and cattle sales for other studs both in NZ and the UK.

For all enquiries to used [yourbid](#) please contact george@yourbid.org

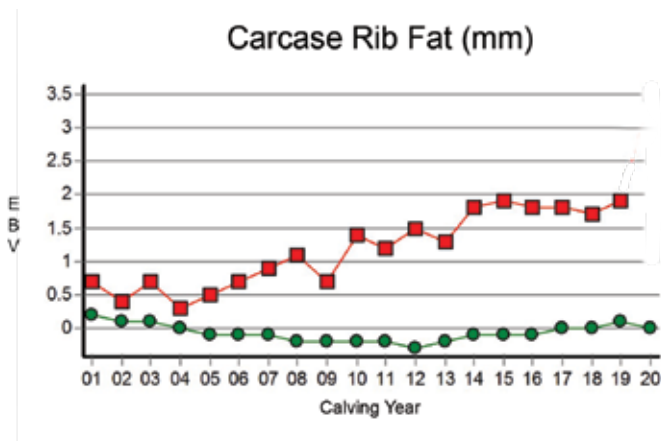

The development of the “Meadowslea Hill Country Type”

has been the result of 25 years of selecting animals that perform the best in our hash hill country environment. Cows that can winter easily on the hill without supplements, stay in good order, calve easily and get back in calf early every year for 10 years has been the focus of our breeding programme.

Ultra-sound scanning has confirmed to us that these easy doing cattle have higher levels of Rib and Rump fat. Science has now recognised that these higher fat levels result in heifers getting in calf earlier with higher conception rates. These higher fat levels also result in increased fertility in the whole herd with earlier rebreeding and less dry cows.

These great positive fat EBV's in the Meadowslea herd have come about simply by selecting animals that suit the Hill Country environment.

- Meadowslea herd
- Australasian herd average

Graph showing improvement in fat EBVs at Meadowslea while running the herd on hill country, compared with Australasian average. From TransTasman Angus Cattle Evaluation, April 2022.

The average rib fat EBVs of the bulls in this catalogue ranks in the top 10% of the breed in NZ.”

Meadowslea Proven Herd Sires

Meadowslea F540

Trait leader for Short Gestation, Milk, and Short Days to Calving. He ranks in the top 15% of the breed for all the fertility and maternal traits measurable. He was ranked 3rd for Short Gestation in the BLNZ Dairy Beef Progeny Test in 2018. His progeny also performed very strongly in the BLNZ Beef Progeny Test cohort 2 – for both growth and carcass traits.

Turihaua Crump E5

Trait Leader for Short Days to calving. 12 years old and still going strong. Over 350 calves to date at Meadowslea. His young daughters are the top breeding cows in the herd and proving to be exceptionally fertile and early maturing - resulting in his Days to Calving figure going down to minus 10 days.

- Breed Trait Leaders for Maternal and Fertility Traits

Meadowslea Meat Machine G914

The Bull we call the “Meat Machine” – Exceptional thickness and fertility traits. He is a Trait leader for Calving Ease, his Low Birth Weight figures are in the top 5% for the breed and his Rib and Rump Fats are off the scale. His sons are full of meat, exceptionally easy doing and very suitable for heifer mating in the harder hill country. We can’t get enough of this bloodline and he now ranks in the top 15% for Self Replacing Index as well.

Meadowslea K703

A son of Meat Machine who has wonderful maternal and fertility traits and ranks in the top 10% of the breed for almost all those key traits responsible for profitability in the hill country in a self-replacing herd. His short days to calving and Rib and Rump fats are off the scale and all this combines to place him in the top 15% of the breed for the Self Replacing Index . His progeny are deep, thick, early maturing and full of muscle.

Quain was selected for mating yearling stud heifers. We were so impressed with his mating performance he was also used to follow up adult stud cows. A moderate framed exceptionally well fleshed son of Taimate Lazarus who ticks a lot of boxes for successful mating of heifers in hill-country. Quain has exceptional calving ease in the top 5% for the breed, short gestation and birth weight in the lowest 15% for the Angus Breed. He has impressive early growth levelling off nicely at the 600day allowing a very moderate cow weight in the lowest 15% for the breed. His fertility traits are strong and his easy doing fats rank him in the top 15%. All this performance generates a Self-Replacing Index in the top 1% for the Angus breed. This reflects the efficient beef cow production the industry seeks at present, with minimal environmental impact.

55%	37%	53%	48%	51%	50%	47%	47%

Comments: Well-balanced Woodbank son, out of a good Piko Burn cow who also bred R684, who was used in the stud last year and sold in this year's winter bull sale. Nice top-line and style about him. Short gestation figure with scrotal size in the top 15% and rump fat in the top 10% of the breed.

Comments: Nicely balanced bull here with super figures for heifer mating - terrific calving ease, short gestation and birthweight in the lowest 1% of the breed. Days to calving figure is also exceptional and his fats are in the top 5%. Sire Q421 was used in the stud and sold to Queensbury Ridges at \$10,500. Out of a 2-year heifer whose own mother H144 bred a stud bull to Bannockburn Angus and was the first-up old cow in our 2022 Female Sale, sold to Okaka Angus. Very nice top-line, balance, style, and width across the top. Worth a good look.

50%	37%	50%	46%	49%	48%	46%	44%

Comments: Very well-balanced bull with an outstanding pedigree and good figures. Sire Q104 was a yearling used to follow up the AI, and his mother is an F540 cow who bred a stud bull P558 sold to Piko Burn Angus for \$18,000 in 2020. Grand-dam D101 is the mother of Meat Machine and is one of our all-time great cows. Very good calving ease, low birthweight, and short gestation with days to calving in the top 20% and fats in the top 10%. Thick, deep, and square with a lovely top-line and worth a good look - a good pick indeed!

Comments: Another thick, moderate, easy-fleshing Quain son. Out of a Rangatira 16209 daughter which was a very good mate, the same cross as lot 32. Very suitable for heifer mating with calving ease and low birthweight. Also has good scrotal size, days to calving and fats in the top 10%, reflected in his very strong self-replacing index. Well balanced bull with a good shoulder and width across the top. A good pick again.

Comments: We lead off this next paddock of bulls with another of these thick, solid N166 sons. Similarly bred to the last, being out of a granddaughter of Meat Machine, he is double bred to be thick and deep. He has very good figures for heifer mating with calving ease, short gestation and low birthweight followed by strong growth. His easy fleshing is easy to see with his fats in the top 20% for breed. Deep and wide in the hindquarter, thick as a brick with quality. A good pick!

Comments: A nicely balanced Timperlea Quain son with lovely clean shoulders and a very strong pedigree. These Quain sons are all very well fleshed and it shows in this chap's figures with rib and rump fats in the top 10% of the breed. Strong data across the board with very good EMA coming down from the dam's sire line from the record-breaking cow G1000. The maternal grandam M542 is the dam of our 2022 keeper bull R646. All this data and background combines to generate an SRI index in the top 10% of the breed. Potential here!

Comments: Another very well-bred bull sired by N166 who also bred Meadowslea Mountain Man sold in 2022 for \$92,500. The dam is the top Lazarus daughter in the herd. S573 is a thick bodied bull with quality fleshing, width across the top, and a good hindquarter. He is suitable for heifers or cows with calving ease, short gestation, and low birthweight followed by strong growth. A deep barrelled, compact bull with a top pedigree.

Comments: The first son of our new sire Turiroa Panther to be offered. The Panther sons all look to display the depth and thickness we expect, and we have a good number who will feature in the 2023 winter sale. S253 has moderate birthweight followed by good growth and strong fertility traits. He has the moderate, efficient cow size with lovely width across the top and a deep hindquarter. Very solid type and a great chance to get the first of the Panther sons a mating season earlier, he will be suitable for both cows and heifers.

Comments: Here is another of these impressive P700 sons that consistently have such great depth and thickness to them. S288 has a good pedigree with dam H200 one of our top 10-year-old cows sold in the 2022 Female Sale. Terrific heifer mating figures with calving ease and short gestation in the top 20% of the breed while his super low birthweight ranks him in the lightest 10% of the breed. A terrific hindquarter with lovely width across the top and the easy doing attributes we look for with rib and rump fats in the top 10% once again.

49%	38%	52%	47%	51%	49%	48%	47%	

Comments: The second of only two sons of Panther in this sale. The balance of the Panther sons will be a real feature of the 2023 winter sale. He is double bred for thickness being out of a good Meat Machine daughter who bred Q524, used as a yearling before selling at lot 1 in the 2021 Bull Sale to Rocky Point Station at \$15,000. S550 shows the depth of body, width across the top, and good hindquarter we expect from these bloodlines. He gives the options of both heifer and cow mating with moderate birthweight followed by good growth with strong fertility. He has exceptional easy-doing attributes with fats in the top 2% for breed. A clean shouldered, upstanding type. He was badly ridden when the mob joined up but is coming right now.

61%	53%	60%	59%	62%	60%	59%	59%

Comments: A classic F540 son with depth of body, a clean shoulder, style and outlook about him. Out of a Meat Machine cow, so proven calving ease bloodlines. A great heifer mating option with calving ease, low birthweight, and short gestation as well as strong fertility and the easy doing fats we aim for.

50%	39%	54%	73%	66%	62%	63%	61%	55%

Comments: Another nice low birthweight bull by P565 this time. Out of a good F540 granddaughter who bred a very good son in the 2022 winter sale sold to Hamish Blakley. Impressive heifer mating figures with calving ease, short gestation, and low birthweight. Compact type with a deep body and good outlook.

Purchaser:	Price: \$

51%	34%	51%	48%	54%	51%	50%	48%

Comments: Here is the last of the strong offering of the Quain sons. S306 has a very good pedigree being out of a 2-year heifer by M564 who is a son of our record price cow G1000. He also has both Crump and F540 in the background, so this is a performance genetic package. Another great heifer option with calving ease, short gestation, and low birthweight. Plenty of EMA in this bloodline with lovely soft fleshing. He displays terrific depth through the hindquarter and the thick and square body type in a moderate frame that does so well in hill-country.

NOTES

Beef-Class Structural Assessment Guide

For docility— 1 is Ideal (Docile), 3 is less ideal (restless) and 5 is aggressive. (Scores of 1 and 2 are preferred).

For traits scored 1-9:

• 4 and 6 show slight variation from ideal but this includes most animals. Any animal scoring 4 and 6 would be acceptable in any breeding program.

• 3 and 7 shows greater variation, but would be acceptable in most commercial breeding programs, but seed stock producers should be wary.

• 2 and 8 are low scoring animals and should be looked at closely before purchasing.

• 1 and 9 should not be catalogued and are considered culls.

Trait	Key	Scoring Range

Premier Bull cover

What is Premier Bull cover?

All bulls auctioned at this sale up to the value of \$50,000 will automatically be covered under FMG's Premier Bull cover for 14 days at no cost to the purchaser.

Length of cover

To extend cover for the specified bull beyond 14 days you need to tick Premier Bull cover 12 months on the Purchaser Instruction and Insurance Slip in this catalogue. The specified bull is then covered for the remaining period of 12 months. The premium is payable to FMG and is in addition to the purchase price of the bull.

If you require an alternative cover period talk to an FMG representative.

Your bull's value

Any bull covered under this policy must be purchased for \$50,000 or less. For any bull purchased over \$50,000 talk to an FMG representative.

During the period of insurance, the specified animal is covered for:

- Death or infertility as a result of accident, disease or illness.
- Transit.
- Theft.

What we will pay

Fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

The Meadowslea hill-country type

Visual appraisal is still very important for selecting cattle to perform in hill - country

MASCULINE TRAITS - A strong head and jaw and thick neck indicate high levels of libido, testosterone and reproduction efficiency

NECK LENGTH - A thicker necked animal matures and reaches puberty earlier and has more libido

A longer neck indicates a higher maintenance animal that is slower to reach puberty and re-breed

HEART GIRTH - Large heart girth is an indicator of vigor and easy keeping ability

Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well on tussock

RIB FAT - Strong rib fat covers are the essential energy store for adverse conditions.

They indicate easy-doing and finishing ability and are directly related to increased fertility in both heifers and cows.

STRUCTURAL BONE - High country cattle cover large distances over rugged terrain so a strong skeleton is essential

HIDE - a good thick skin and coat is essential in the cold harsh environment

FLANK - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency

Higher flanked animals tend to be flighty, are higher maintenance and take longer to finish on grass

SCROTAL SIZE - Larger scrotal size at 12 months indicates daughters will reach puberty earlier, be more fertile, and re-breed early every year.

OUR EXCITING NEW SIRE Purchased May 2022, \$81,000
